NWS Louisville KY

National Weather Service Louisville KY

Winter Weather Advisory for Wintry Mix Today

- Winter Weather Advisory effective for much of central Kentucky.
- At any one location precipitation will begin as wintry mix of snow and sleet, then transition to freezing rain, and then eventually to rain.
- Transition to all rain has already occurred near Tennessee, will occur by 1pm EST/noon CST from Hartford to Lexington, and early this afternoon along the Ohio River.

Precipitation is exiting the region. Any further precipitation along and west of I-65 this afternoon will be extremely light.

Expected Snow/Ice Accumulations
